COLOUR-ENHANCING STONE PROTECTION

IMPREGNATOR WITH
STAIN RESISTANCE

THE PROBLEM WHY STONE LOSES COLOUR

Water & Oil Resistant

Natural stone is inherently porous and progressively loses its tonal depth under high foot-traffic, cleaning and environmental exposure. Flagstone Fix professional enhancement system penetrates these open capillaries, restoring colour richness while reducing contaminant absorption & preserving the stone's natural character.

THE FLAGSTONE FIX SOLUTION:

COLOUR-ENHANCING IMPREGNATOR TECHNOLOGY

DEEP PENETRATING ENHANCEMENT

Enriches natural stone colour by saturating surface pores for a deeper, uniform tone.

WATER AND OIL RESISTANT

Reduces absorption of water and oil-based contaminants without forming a surface film.

BREATHABLE PROTECTION

Maintains vapour transmission, preserving the stone's natural texture and finish

BENEFITS

- Long-lasting colour enrichment
- Reduces absorption of water & oil stains
- It enhances breathability and lowers maintenance costs.
- Advanced solvent-free formulation
